Installation et
configuration
d'une borne Wi-Fi*

Définition

Une borne WiFi TP-Link est un appareil conçu pour fournir un accès réseau sans fil dans un environnement local, comme un bureau, un domicile ou un espace public. Les bornes WiFi TP-Link utilisent la technologie sans fil pour créer un point d'accès à Internet auquel les appareils clients peuvent se connecter pour accéder aux ressources réseau et à Internet.

Configuration de la borne Wi-Fi

Il faut commencer par connecter son PC à la borne en filaire. Puis à l'aide d'un navigateur aller sur <https://tplinkwifi.net>. Utiliser « admin » comme identifiant et comme mot de passe, puis cliquer sur connexion.

The screenshot shows a web browser window with the address bar displaying <http://tplinkwifi.net>. Below the address bar, there are two input fields: the first is for the username, containing the text 'admin', and the second is for the password, also containing 'admin'. Below these fields is a blue button labeled 'Connexion'. A mouse cursor is pointing at the 'Connexion' button.

Cliquer sur « Quick Setup » dans le menu puis sélectionner « WAN Connection Type » ou « Auto-Detect » en cas de doute sur la connexion.

The screenshot shows the 'Quick Setup - WAN Connection Type' page. It features a list of radio buttons for different connection types: 'Auto-Detect', 'Dynamic IP (Most Common Cases)', 'Static IP', 'PPPoE/Russian PPPoE', 'L2TP/Russian L2TP', and 'PPTP/Russian PPTP'. Below the list, there is a note: 'Note: For users in some areas (such as Russia, Ukraine etc.), please contact your ISP to choose connection type manually.' At the bottom right, there are two buttons: 'Back' and 'Next'. A mouse cursor is pointing at the 'Next' button.

Utiliser les paramètres par défaut du réseau ou les personnaliser, puis faire « Next ».

The screenshot shows the 'Quick Setup - Wireless' page. It has a 'Wireless Network Name' field with the value 'TP-LINK_7AFF'. Below it, under 'Wireless Security', there are three radio buttons: 'Disable Security', 'WPA-PSK/WPA2-PSK' (which is selected), and 'No Change'. The 'WPA-PSK/WPA2-PSK' option has a text input field containing 'XXXXXXXX'. A note below the field says: '(You can enter ASCII characters between 8 and 63 or Hexadecimal characters between 8 and 64.)'. At the bottom right, there are two buttons: 'Back' and 'Next'. A mouse cursor is pointing at the 'Next' button.

Enfin, cliquer sur « Finish » pour terminer la configuration.

The screenshot shows the 'Quick Setup - Finish' page. It features a heading 'Congratulations!' followed by a paragraph: 'The basic internet and wireless settings are finished, please click Finish button and test your internet connection. If it is failed, please reboot your modem and wait 2 minutes or run the Quick Setup again.' At the bottom right, there are two buttons: 'Back' and 'Finish'. A mouse cursor is pointing at the 'Finish' button.
